In the Settings app, touch Privacy, then touch Photos.Q: Python: How to read a file in a specific directory using random.choice()? I am trying to read all files in a specific directory and then create a sublist of any files that happen to be in the directory. Then I would like to use random.choice() to pull an item from the sublist. I am having trouble using directory.open() to open a specific directory in python. Current Code: import numpy as np import random import glob word\_list = [] def get\_word\_list(): list = [] path = r'C:\Users\jmcirick\Desktop\test' for root, dirs, filenames in os.walk(path): word\_list = [os.path.join(root, filename) for filename in filenames] return word\_list #print(word\_list) word\_list = get\_word\_list() 6d1f23a050
