I want to check whether the table exist or not while importing the data, if exist then only execute the statement and if not than execute the insert query. I have search the SOF, but I could only found similar question related to MS SQL. A: This is how I would do: Connection conn = getConnection(); PreparedStatement insertStatement = conn.prepareStatement("INSERT INTO Table1 VALUES(?,?)"); ResultSet myRows = insertStatement.executeQuery("SELECT * FROM Table1 WHERE 1=1"); if (!myRows.next()) { // table not exist // create table c6a93da74d
